

Faber & Greve

Founded/Born

1863 - ???

Closed/Death

Still active?

no

Description

Faber & Greve GmbH, based in Salzhemmendorf, was founded in 1863 by Heinrich Faber. In the late 19th century, the company transitioned to building pneumatic organs and frequently constructed multiplex organs. F. K. Greve later joined as a partner, but the partnership ended after 1918. In 1926, the company was taken over by Faber's sons, continuing the organ-building tradition under the family name.

Oiste, Kirche zu Oiste

Vorm Dorfe 10, 27337 Oiste, Germany

Builder	Faber & Greve
Year	1927
Period/Style	Neo-Classical
Stops	12
Keyboards	1+P
Keyaction	tracker/mechanical
Tuning	Equal at 440 Hz

Description

The Evangelical Lutheran Church in Oiste houses an organ with a rich history. Originally built in 1838 by Ernst Wilhelm Meyer, the organ underwent significant alterations in 1927 by the firm Faber & Grewe, which included changes to much of the pipework. The organ, which has 13 registers distributed across a manual and pedal, includes several historical elements from Meyer's original construction, particularly in the prospekt and casework.

Further revisions were made in 1969 by the company Wolf from Verden, and the most recent work occurred in 2005, carried out by Jörg Bente Orgelbau. Despite these modifications, the organ retains a connection to its historical roots, blending elements from its original 19th-century construction with later 20th-century adaptations.

Stoplist/Disposition

Manual	Pedal
Principal 8'	Subbaß 16'
Gedackt 8'	Octavbaß 8'
Octave 4'	Octave 4'
Gemshorn 4'	Rauschbaß 3f
Quinte 2 2/3'	
Octave 2'	
Blockflöte 2'	
Mixtur 4f	

Additional: I/P
