Description

Orgelbau Mühleisen is an organ building company founded by Konrad Mühleisen in 1986 in Leonberg. The roots of the family business trace back to Ernest Mühleisen, who established his own organ workshop in Strasbourg in 1941, named Manufacture d'Orgues Muhleisen. Ernest's brother, Gotthold Mühleisen, was a plant manager at Orgelbau Friedrich Weigle, where Konrad also worked. Following the dissolution of Weigle in 1985, Konrad Mühleisen, alongside former Weigle colleagues, started his own company in Leonberg.

Since its inception, Orgelbau Mühleisen has completed over 100 new organ constructions and has also undertaken numerous restorations of historical instruments. As of 2019, the company employed 22 people, reflecting its growth and continued dedication to the craft of organ building.

Description

The Organ was constructed by Konrad Mühleisen Orgelbau, based in Stuttgart/Leonberg, in 1999. Previous versions of the organ include a new build in 1787 by Jürgen H. Angel from Flensburg, which was redesigned and extended multiple times. Another new build was made in 1983 by Rudolf Neuthor from Kiel, which was later moved to Poland in 1999. The visual design of the organ was done by sculptor Ulrich Lindow from Schobüll.
