Builder	E. Tolle
Year	1972
Period/Style	Neo-Baroque
Stops	11
Keyboards	1+P
Keyaction	tracker/mechanical

Description

The pipe organ was constructed by Eberhard Tolle, Preetz in 1972. The casing of the predecessor instrument, dating back to 1844, was reused. This original instrument was created by Marcussen & Søn and was donated by a woman named Margarethe Stuhr, who was a miller in Stuhr. There is still an image of the benefactress attached to the north wall under the gallery as a testament to this history.
