Description

In the chapel of Breitenburg Castle, you'll find this organ of unknown builder, but it is highly likely that it was made by Johann Hinrich Mittelhäuser (1713/14 to 1786) from Wilster. In 2022, the instrument underwent comprehensive restoration by organ builder Reinalt Klein from Lübeck.

This organ is a remarkably well-preserved example of late Baroque small organ construction in its compact design and completeness.
