Description

The two manual organ of the Evangelische Stadtkirche Zöblitz in the Ore Mountains was built by Silbermann in 1742. Hence it belongs to his later works. With 20 stops it is a representative of an instrument type that he realized several times, for example in Freiberg, Fraureuth, Reinhardsgrimma and Forchheim. Thanks to a donation the organ could be carefully restored in 1997 so that nowadays it presents itself in an impressive manner. During the restoration it was also possible to uncover the original coloration of the facade.
